

VINVENTIONS

2021/06/30, Thimister-Clermont

Dear customer,

We hereby confirm that we took into account the positive lists published by the Japanese authorities in response to the new law on food sanitation act.

This new regulation entered into force on 2020, June 1st with a confirmed 5 years-grace period; meaning that it is still possible to import articles (intended to come into contact with foodstuffs) that were already on the market before May 31th, 2020.

Nevertheless, we specify that Nomacorc closures are made from substances listed on the existing Positive Lists of Japanese Food Sanitation Act as following.

	Substance	CAS registry number	REF / Appended Table
CLOSURE MATERIAL	1-alkene/ethylene copolymer	9010-79-1 25087-34-7 25213-02-9 25213-96-1 25895-46-9 25895-47-0 26221-73-8 28829-58-5 60785-11-7	No.982, APPENDED TABLE 1, Table 1, (1)
	ethylene/propylene copolymer	9010-79-1	No.851, APPENDED TABLE 1, Table 1, (2)
	Talc	14807-96-6	No.475, APPENDED TABLE 1, Table 2
TREATMENT SURFACE	Ethylene/tetrafluoroethylene copolymer	25038-71-5	No.856, APPENDED TABLE 1, Table 1, (1)

This information is patented and part of our know-how. This declaration is based on the information received from our raw material suppliers.

Faithfully yours,

Christophe Robert
Quality Europe Manager
